

PURESAN[®]

Bio Sewer

Puresan Bio Sewer – go from bad to good. A high concentration microbial waste water treatment additive that contains no pathogens or harmful toxins and chemicals. Putting Nature’s cleaners to work to solve made-made issues, the natural way.

Application

- **Puresan Bio Sewer** is a natural biological high potency waste water treatment additive that contains no pathogens or harmful toxins and chemicals.
- **Puresan Bio Sewer** contains a full spectrum of microbial organisms specifically selected to treat all forms of organic waste and contains no less than 8 million viable organisms per ml.
- **Puresan Bio Sewer** is effective in both oxygen rich and oxygen deprived environments.
- **Puresan Bio Sewer** will effectively treat:
High organic solids like bottom and surface sludge;
High nitrogenous compounds like Ammonia, nitrites and nitrates;
High sulphurous compounds like Hydrogen sulphide;
High carbonaceous compounds like Fats, Oils and Grease;
High Phosphurous compounds like Phosphates
Effectively lowering COD, BOD and TSS in your effluent.
- **Puresan Bio Sewer** is used effectively in:
Industrial waste water applications / Fruit processing effluent / Meat processing effluent / Municipal effluent
Domestic effluent / Polluted open water systems as well as rivers and streams / Tannery effluent

Puresan Bio Sewer is available in 1L, 20L and 1000L
