

# PURESAN®

## Bio Block

Puresan Bio Block is a unique proprietary block that allows aeration and biological treatment of stagnant, anaerobic and anoxic water.

### Application

- **Puresan Bio Block** for the treatment of waste water, septic tanks and pit toilets.
- **Puresan Bio Block** is an environmentally positive product that produces valuable pure oxygen which is needed in conjunction with specialized organisms for the breakdown of Ammonia, hydrogen sulphide, Fat Oil & Grease, as well as carbon-based organics as well as introducing much needed carbonates to ensure optimal biological action.
- **Puresan Bio Block** does not require expensive dosing systems and air compressors for the supply of the needed oxygen, effectively reducing electricity costs.
- **Puresan Bio Blocks** are small, easy to transport and manage.
- **Puresan Bio Blocks are used as follows:**  
 One Block used every three months per pit toilet  
 One block is used every month per septic tank  
 One block is used peer 50 000 litres of waste water per week  
 One black is used for every 5-10 cubic metres in a grease trap

Puresan Bio Block is available in containers of 20's
