

# PURESAN BWT

Puresan BWT (Bulk Water Treatment) a high concentration ionic solution for municipal water, tanks, rivers and lakes.

## Application

- Puresan commits to providing products with a positive eco-balance that respects the concept of “the correct dose” for the smallest ecological footprint possible whilst adhering to recent European standards for biodegradability.
- Puresan Bulk Water Treatment ensures that water used for domestic and industrial use is free of waterborne disease forming bacteria without the use of chlorine and harmful chemicals.
- Kills all known water-borne pathogens.
- Assists in keeping all pipes and water distribution equipment free of biofilm and hard water scale build-up.
- Very cost effective.
- Human, animal and earth friendly in correct dilution ratio.
- Safe for users – simple to use – environmentally positive.
- 1 Litre of Puresan BWT will treat between 25,000 and 200,000 litres of water – the dosage is dependent on the full raw water analysis, and thus may vary greatly per application.

Available in 25 Litre, 210 Litre and 1000 Litre containers.
