

Testimonial regarding wound on As Time Goes On's leg

To whom it may concern,

I would like to express gratitude to African Water Solutions and their product Pure Vet. I can only give praise to this product. Completely natural – it healed a wound that was near fatal to my horse in less than 3 months.

My horse got stuck in a stable door on April 13th 2015, and a vet was called out to treat what seemed like superficial wounds. A week later, my horse was grossly unsound and when the vet was called out he told me that the wounds were infected and that it was bone level and he advised me that we might have to put her down.

At this point I started to apply a diluted solution of Pure Vet and water – a very strong solution of Pure Vet to 2l of water. I applied it liberally as a spray 3 times a day – every time that I cleaned the wound. I started applying it on April 20th 2015.

The photos below show the wounds progression and the last photo in the sequence was taken on July 20th 2015.

1) 20 April evening prior
to Pure Vet

2) 21 April next morning
before second application

3) About midway
through treatment

4) 20 July '15

Once again, I thank African Water Solutions as well as sing the praises of its products. I can recommend any African Water Solutions product to anyone, especially anyone who has to deal with an injury such as I have. Thanks to African Water Solutions and Pure Vet I managed to keep my horse alive.

Regards,

Natasha Pieterse
