

# PURESAN<sup>®</sup> **CLEAR SPA**

Clear Spa is a product that is 100% environmentally + and puts nature's elements to work to solve Jacuzzi and Spa water issues the natural way.

## Application

- Only 50ml of Puresan Clear Spa is required for every 1000 litres of water in the Jacuzzi/Spa.
- Water pH reading to be between 6.8 – 7.2.
- Ensure the water Total Alkalinity reading is between 80-120ppm.
- Set the Jacuzzi/Spa pump to circulate, add the required amount of Puresan Clear Spa to the water and leave to circulate for approximately 1 hour after which operate unit as normal.
- If the Spa is utilised frequently it is recommended to add a tablespoon of chlorine to the Spa once a week. The chlorine will be untraceable within 30 minutes and is used to oxidise the organics in the water. The continued dosage rate and amount of Clear Spa is determined by how frequently how many people use the Jacuzzi/Spa. Use the Puresan recommended test strip indicator and ensure the copper reading is kept between 0.5 and 0.9.
- Ensure that normal cleaning of the unit's filters is undertaken.
- Clear Spa does not contain chlorine.
- Do not store Puresan Clear Spa with alkalis (caustic solutions).
- Ensure container is tightly closed and stored in a well-ventilated place at +5°C to +30°C.
- *Does not cause irritation often caused by Chlorine gasses and heat.*

Available in 100ml screw cap bottles
